

The future of work with AI

Extract from the Artefact and Odoxa report on the Future of Work - February 2025

AI Agents - the future of work

Utilisation

44% use AI daily,
while 83% use it
weekly

Satisfaction

92% are
satisfied with AI

Time saved

AI users save an
average of 57 min/day
The top 4% save more
than 3 h/d

AI is here to stay: strong adoption, high satisfaction, real-time savings.

AI Agents: Less routine, more value

Less repetitive tasks

data entry, filing, answering simple queries

AI agents enable employees to manage
a variety of tasks

More versatility

Birth of new professions

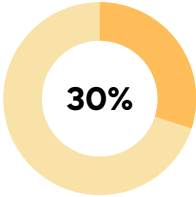

AI agent supervisor, AI workflow
architect, etc.

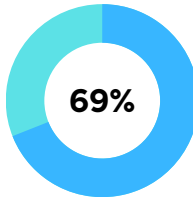

AI frees up time, diversifies tasks and creates the jobs of tomorrow.

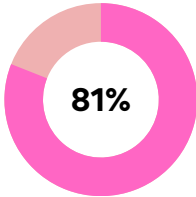

Boost your productivity with AI agents

30% say they perform more tasks than
before thanks to AI

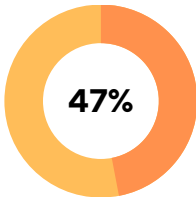

81% have seen an increase in
productivity in their department

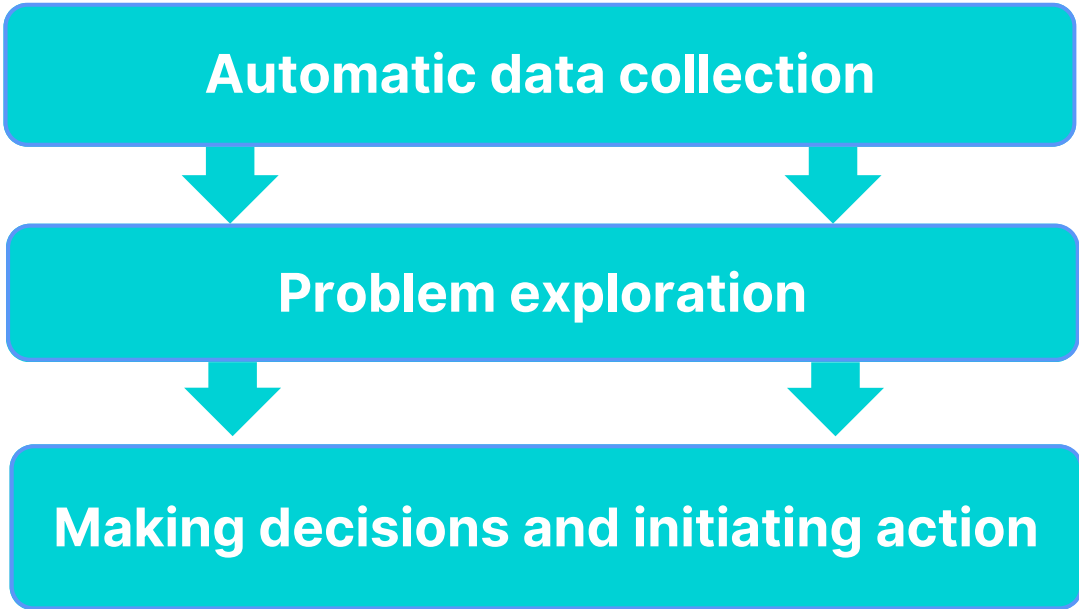

69% have seen improved access to
knowledge

47% of trained AI users say they still
need training

AI speeds up work, enriches knowledge and redefines skills.

A new lever for efficiency

AI agents go beyond simple predictive scoring to perform entire tasks.
